10 | If the PXE Proxy service is ~~not~~ executing, then a
determination is made about whether or not the availability of
the local server (absolute availability and/or relative
availability) is below a lower threshold (step ~~406~~). If not,
15 | then the process branches to step ~~414~~. If the availability is
below the lower threshold, then the Boot Monitor daemon
requests the service manager to stop or suspend the PXE Proxy
service (step ~~408~~). The manner in which the PXE Proxy service
is suspended may vary depending upon several factors, such as
15 | the operating system of the local server.
